🐙 trinhhungfischer

Summary

Game Designer with 4 years of experience designing Midcore and Casual mobile games. Core strengths in core loop design, meta-game systems, progression and balance for products serving millions of players. Strong technical foundation with effective application of AI tools in the design workflow.

Experience

Game Designer

Hanoi, Vietnam

Zitga

Feb 2023 – present

- Led design of midcore game [Guardian War](#) (Squad RPG) and served as Lead Designer for [Stickman Defense: Survival TD](#), [Pixel Squad](#), and several Puzzle titles
- Built and maintained comprehensive Game Design Documents: core loop, meta-game, progression system, and economy
- Focused on Level, Progression, Economy Design and Game Balancing: increased revenue of [Galaxy War](#) by 30% through balance redesign and player experience loop optimization
- Proficient in Figma and Photoshop for in-game UX flow design and wireframing
- Applied AI tools (Claude, Gemini) to system and level design workflows, significantly boosting production speed
- Led sprint planning and backlog grooming under Agile methodology; coordinated cross-functional team (Dev, Art, QA) to ensure on-time milestone delivery

Game Developer (Internship)

Hanoi, Vietnam

Zingplay Studio - VNG

May 2022 – Aug 2022

- Developed a Casual Tower Defense prototype [Sinh Tu Mon ZingPlay](#) using Cocos2D (client) and Bitzero (server)

Data Scientist (Internship)

Hanoi, Vietnam

ToVChain

Nov 2021 – May 2022

- Analyzed user behavior and contributed to developing investment recommendation features on [Trava Finance](#)

Notable Projects

[Stickman Defense: Survival TD](#)

Zitga

Jan 2026 – present

- **Genre:** Midcore Strategy/RPG | **Platform:** Mobile | **Engine:** Unity
- **Core loop:** Players defend their base, eliminate attacking monsters, receive rogue-like upgrades, and defeat Bosses for rewards; further strengthen characters via equipment, pet system, and various meta systems
- Built and owned the entire game metrics system — from progression curve and balance sheet to power scaling — as the design foundation for all content and meta systems
- Lead Game Designer: designed character systems, progression, economy, guild, events, and the full in-game UX flow
- **Stats:** 300K+ downloads · 7K DAU · Rating 4.7★

[Guardian War: RPG Pixel Hero](#)

Zitga

Feb 2023 – Feb 2024

- **Genre:** Midcore Strategy/RPG | **Platform:** Mobile | **Engine:** Unity
- **Core loop:** Players collect and upgrade heroes to conquer dungeons, defeat bosses, and explore new lands chapter by chapter
- Built core metrics framework and user progression system (early/mid/late game), creating a standardized blueprint for supplementary gameplay system design
- Designed and balanced systems: hero stats, progression, economy, PvP/PvE, and seasonal events

- Designed world map, characters, and enemy scaling across content zones
- **Stats:** 1M+ downloads · 29K DAU · Rating 4.6★

Block Jam Away: Color Slide

Zitga

June 2025 – Aug 2026

- **Genre:** Casual Puzzle | **Platform:** Mobile | **Engine:** Unity
- **Core loop:** Players slide and match colored blocks to solve puzzles level by level
- Lead Game Designer: designed progression system, level design, and economy
- Automated the level design workflow (100 levels / 2 days) and built an automated difficulty testing tool
- **Stats:** 100K+ downloads · 5K DAU · Rating 4.4★

Sinh Tu Mon ZingPlay

Zingplay Studio - VNG

May 2022 – Aug 2022

- **Genre:** Casual Tower Defense | **Platform:** Mobile | **Engine:** Cocos2D
- Programmed client UI, gameplay mechanics, and several server systems synchronized with the client

Skills

Game Design: GDD, Core Loop Design, Meta-game System, Progression & Economy Design, Game Balancing, Level Design, PvP/PvE Design, Event Design, Monetization (IAP/IAA)

Analytics & Optimization: Data-driven Design, A/B Testing, Metrics Analysis (Retention/DAU/Conversion), Player Behavior Analysis

Tools & AI: Unity, Cocos2D, Machination, Figma, Photoshop, Claude, Gemini

Programming: C#, Python — able to read and understand code; collaborate effectively with Dev team

Language: English — proficient in reading technical documentation and GDD

Education

Hanoi University of Science and Technology (HUST)

Hanoi, Vietnam

BS in Computer Science (Talented Program)

Aug 2019 – Feb 2025

- GPA: 3.57 / 4.0

Activities

- **Honor Award — Axie Game Hackathon 2022:** Team UDestiny (4 members) achieved Top 4 — Honor Prize. Product was a card game set in the Axie Infinity universe with mechanics inspired by Rock-Paper-Scissors.
- **Third Prize — Vietnam Mathematics Olympiad 2019 (VMO):** Awarded Third Prize in the Vietnam National Mathematics Olympiad, a highly competitive national contest for outstanding high school students.
